---	---	---

WATER RESOURCE CHECKLIST:

- location of floodway location of flood fringe location of ordinary high water level
- location of present water line high water level setback location of highest known water level
- existing local drainage location of wetland areas

SCALE: 1 inch = _____ ft Drawn by: _____

GENERAL PROVISIONS

1. Permittee shall maintain temporary erosion controls at all times during construction in order to prevent erosion into any adjacent water body or watercourse. Temporary erosion controls comprise straw bales, straw mulch, pollution curtains, filter cloth and the like.
2. Permittee shall install permanent erosion control measures in order to prevent erosion of disturbed soils from the project site onto adjacent parcels of land, public waters, public roads, ditches, sewer facilities and the like. Permittee shall cease all related authorized construction activities until such time as any such problem is corrected as agreed to by the permitting authority. All permanent erosion control measures shall be installed within seven (7) days of completion of final grading or the termination date of this permit, whichever comes first.
3. No changes in plans or specifications can be made to the work authorized herein unless such change is first approved in writing by the permitting authority.
4. Permittee shall grant access to the site at all reasonable times so that the permitting authority or his/her agents may conduct inspections to ascertain compliance with the terms and conditions of this permit.
5. The construction site shall be kept reasonably free of debris at all times so as to not create a public nuisance.
6. No zoning compliance may be issued until all the provision and conditions of this permit are complied with in full.
7. A copy of this permit or an official notice or placard thereof must be posted in a conspicuous place protected from the effects of weather no more than 12 feet above grade on the premises which the work is to be done and shall be maintained there until completion of said work.
8. The granting of this permit does not exempt the permittee from having to secure other permits from other state, federal or local units of government which may have jurisdiction over portions of the authorized project.

Certification:

I hereby certify with my signature that all data on my application forms, plans, and specifications are true and correct to the best of my knowledge. I understand the permit may be revoked at any time if information provided on this application is not correct.
