Minnesota Rule 9502.0435, Subpart 13 D, requires that bleach and water be used when disinfecting the diaper changing area. In order to apply for a variance for other product, Benton County requires that the product must be as effective as bleach and water as a disinfectant. It must be effective against pseudomonas aeruginosa, staphylococcus aureus, and salmonella cholerae suis. It must have the EPA registration number, kill germs in 10 minutes or less, and have clearly described directions for mixing and/or use.

The following is a list of EPA #'s that are approved for use:
