NEWS RELEASE

November 4, 2016

FOR IMMEDIATE RELEASE

CSAH 3 (2nd Street North) Active Traffic Signals

The traffic signal at CSAH 3 and Stearns Drive in Sauk Rapids is now activated. The signal is currently in an ALL-RED, ALL-WAY flash mode. This means that drivers shall treat the intersection like and all-stop intersection. Then overnight Sunday to Monday morning the traffic signal will become fully operational. This means that traffic will need to obey the indicated color of the traffic signal, eight green, yellow or red.

Traffic is configured as one lane in each direction on either side of the median. This will be the traffic pattern over the winter. The roundabouts at 6th Ave and Summit Ave are still closed but are anticipated to be open before Election Day. Workers will be present on the project so be advised and drive carefully.

Project updates will be posted to the Benton County Twitter account and Facebook page. Questions can be directed to the Project Manager, Benton County Engineer Chris Byrd at (320) 968-5051, or cbyrd@co.benton.mn.us.
