10th Avenue Roundabout

The 10th Avenue roundabout uses the rural vernacular evergreen "windbreak" to separate the ornamental grassland from the color infused "potted prairie".

Features:

- Diagonal "wind-break" planting of evergreen trees and upright shrubs.
- Semi-circular plantings of strictly ornamental grasses to reminisce the cultivated fields of the rural landscape to the southeast and ornamental grasses with randomly planted native flowers to acknowledge the diversity of form found in the urban landscape.
- Portion of splitter islands planted with low growing daylilies.

CSAH 1 Roundabout

The CSAH 1 roundabout responds to the most rural development pattern.

Features:

- Sparse planting of evergreen trees and upright shrubs within a circular matrix of ornamental grasses surrounded by a perimeter planting of ornamental grasses and randomly planted native flowers.
- Portion of splitter islands planted with low growing daylilies.
